

# STF Precision Diamond Tools for Contact Lens Lathes

Formed as a spin-off of the Norton Company, STF passed extensive testing from Oak Ridge national laboratories and is certified as a preferred vendor to all United States government agencies, including NASA, Fermilabs and Lawrence Livermore labs, all of whom are active customers. STF also markets to the public sector and lists a wide range of companies and industries using its tools, including Ciba-Vision, Bausch & Lomb, Boeing, Lockheed Martin, Ford, IBM, Toyota and 3M.

In 2002 STF entered the contact lens industry in earnest, forming a partnership with Wildman Sales and Marketing for exclusive distribution of its diamond tools.

**STF Precision has been manufacturing high tolerance diamond tools for over 10 years.**
